SECTION II – RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all information in this Letter of Offer, including the risks and uncertainties described below, before making an investment in the Equity Shares. Additionally, the risks set out in this section may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. If any or a combination of the following risks or other risks that are not currently known or are now deemed immaterial actually occurs, our business, prospects, results of operations and financial condition could suffer, the trading price of the Equity Shares could decline and you may lose all or part of your investment. Unless specified in the relevant risk factor below, we are not in a position to quantify the financial implication of any of the risks mentioned below. Any potential investor in the Equity Shares should pay particular attention to the fact that we are subject to regulatory environment that may differ significantly from one jurisdiction to another. In making an investment decision, prospective investors must rely on their own examinations of us on a consolidated basis and the terms of the Issue, including the merits and the risks involved. Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue.

For further details, see “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 104 and 226, respectively, as well as the other financial and statistical information contained in this Letter of Offer. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

This Letter of Offer also contains forward-looking statements which involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Letter of Offer. For further details, see “Forward-Looking Statements” on page 14.

Unless otherwise stated or the context otherwise requires, the financial information used in this section is derived from our Restated Financial Information.

INTERNAL RISK FACTORS

- 1. There are outstanding litigations against our Company and Directors. An adverse outcome in any of these proceedings may affect our reputation and standing and impact our future business and could have a material adverse effect on our business, financial condition, results of operations and cash flows.**

As on the date of this Letter of Offer, we are involved in certain civil, tax and criminal legal proceedings, which are pending at different levels of adjudication before various courts, tribunals, forums and appellate authorities. We cannot assure you that these legal proceedings will be decided in our favour. Decisions in proceedings adverse to our interests may have a significant adverse effect on our business, financial condition, results of operations and cash flows. In relation to tax proceedings, in the event of any adverse outcome, we may be required to pay the disputed amounts along with applicable interest and penalty and may also incur additional tax incidence going forward.

A summary of pending tax, criminal proceedings and material litigation involving our Company and Directors is provided below:

Litigations against our Company

Category	Company	
	No. of Proceedings	Amount, to the extent quantifiable (Rs. In lakhs)

Direct Tax	0	0
Indirect Tax	20	2713.15

Litigations against our Directors

Category	Directors	
	No. of Proceedings	Amount, to the extent quantifiable (Rs. In lakhs)
Criminal proceedings	1	N.A

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current or long term liabilities or reduce our cash and bank balance. For further details, see “Outstanding Litigation and Defaults” on page 239.

- 2. Our order book may not necessarily indicate our future income. Orders included in our order book may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.**

Our future earnings related to the performance of orders in the order book may not be realized and although the orders in the order book represent business that is considered firm, cancellations or scope or schedule adjustments may occur. We may also encounter problems executing the orders as ordered, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone an order or cause to be cancelled. Due to the possibility of cancellations or changes in scope of an order, we cannot predict with certainty when, if or to what extent an order book will be performed. Additionally, delays in the completion of an order can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such order. In addition, the contracting parties may default or otherwise fail to pay amounts owed. Any delay, cancellation, execution difficulty, payment postponement or payment default with regard to the order book or disputes with customers in respect of any of the foregoing, could materially harm our cash flow position and income.

- 3. We are involved in high volume-low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.**

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to raw material procurement, timely sales / order execution and continuous cost control of non-core activities. The table below gives details of our operating margins and net profit margin based on restated financials.

(Rs. In lakhs)

Particulars	Financial Year ended		
	FY 2014-15	FY 2015-16	FY 2016-17
Total Income	7,537.76	8,207.19	8,335.75
Profit before Tax as a % of Total Income	1.38%	(2.37)%	*(2.39)%

Profit after Tax as a % of Total Income	0.72%	(2.37)%	*(2.39)%
---	-------	---------	----------

**For the purpose of calculating profit before tax, we have considered an exceptional item i.e. sales tax paid under amnesty scheme.*

Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations for our past results, please refer “Management’s Discussions and Analysis of Financial Condition and Results of Operations” on page 226 of this Letter of Offer.

4. It is difficult to compare our performance between periods, as our revenue fluctuates significantly from period to period.

We derive our income from manufacturing, marketing and sale of material handling, industrial finishing and engineered products. Our income from these activities may fluctuate significantly due to a variety of factors. For example, government does not give orders in first quarter and generally gives order only in the last quarter to use the budget allocated to them and they give orders quickly. Depending on our operating results in one or more periods, we may experience cash flow problems and difficulties in covering our operating costs, which may adversely affect our business, financial condition and results of operations. Such fluctuations may also adversely affect our ability to fund future projects. As a result of one or more of these factors, we may record significant turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Furthermore, the periods discussed in our financial statements included in this Letter of Offer may not be comparable to each other or to other future periods, and our results of operations and cash flows may vary significantly from period to period, year to year, and over time. Therefore, period to period comparisons of our results of operations should not be relied upon as indicative of our future performance.

5. Our Company is dependent on external suppliers for key materials and components.

Our Company is dependent on external suppliers for most of our machinery / components requirements. The failure of our suppliers to deliver these materials or components in the necessary quantities or to adhere to delivery schedules or specified quality standards / technical specifications, could adversely affect our business and our ability to deliver on time and at the desired level of quality giving rise to contractual penalties or liability, for failure to perform contracts, and a loss of customers and damage our Company’s reputation, any of which could materially adversely affect its results of operations.

Also, qualifying alternative suppliers that can meet our Company’s technical and quality standards, and who can supply these materials in necessary quantities, would entail substantial cost and could cause delays in deliveries of our Company’s products. Any of the foregoing could have a material adverse effect on the Company’s business, financial condition and results of operations.

Further, if the costs of these materials were to rise due to factors such as rises in input and commodity prices or shortages in supply, and our Company is not able to recover these costs through cost saving measures elsewhere or by increasing the prices of its products, our results of operations could be adversely affected. As such, should cost of materials rise, our Company can provide no assurance that it will be able to pass on any additional costs to our customers, and accordingly our results of operations could suffer. Finally, as our Company often purchases in advance, materials based on our estimate of customer demand for an upcoming period, in the event

prices for these materials subsequently decline there can be no assurance that our Company will be able to price our solutions based on the material costs it actually incurred, which would make its solutions uncompetitive compared to those of competitors who have not locked in their material supplies.

6. We rely on third-party transportation providers for all of our product distribution and failure by any of our transportation providers to deliver our products on time or at all could result in loss in sales.

We depend on third-party transportation to receive input materials required for our products and to deliver our finished products to our customers. However, we do not own any trucks or commercial vehicles and typically use third-party logistics providers for all of our product distribution and input materials procurement. This makes us dependent on such third-party logistics providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to deliver the requisite quantities of products in time to our customers, which may result in cancellation or non-renewal of purchase orders, and could adversely affect the performance of our business, results of operations and cash flows.

Disruptions of transportation services because of weather-related problems, strikes, inadequacies in the road infrastructure, or other events could impair the ability of our suppliers to deliver input materials to us and our ability to deliver completed products to our customers in a timely manner. Further, since we do not have warehousing capabilities at any of our manufacturing facilities, we maintain an inventory stock which may only facilitate our operations for one to three days. As a result, in the event there is any disruption in the supply of our raw materials, performance of our business, results of operations and cash flows may be adversely affected.

Additionally, if we lose one or more of our transportation providers, we may not be able to obtain terms as favorable as those we receive from the third party transportation providers that we currently use, which in turn would increase our costs and thereby adversely affect our operating results. Further, our transportation providers do not carry any insurance coverage. There can be no assurance that we will receive compensation for any such claims in a timely manner or at all, and consequently, any such loss may adversely affect our business, financial condition, results of operations and cash flows

7. We are dependent on a number of key personnel and services of the members of senior management and the loss of such persons, or our inability to attract and retain key personnel and senior management in the future, could adversely affect our business, growth prospects, results of operations and cash flows

Our ability to meet future business challenges depends on our ability to attract, recruit and retain talented and skilled personnel. We are highly dependent on our Promoters, our Directors, senior management and other key personnel, including skilled project management personnel. Our management and technical personnel are supported by other skilled workers who benefit from regular in-house training initiatives. The loss of any of our Promoters, our Directors, senior management, external consultants or other key personnel, or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business, growth prospects, results of operations and cash flows.

We face competition to recruit and retain skilled staff. Due to the limited availability of skilled personnel, competition for senior management in our industry is intense. We may experience difficulties in attracting, recruiting and retaining an appropriate number of skilled staff for our business needs. We may also need to increase our pay structures to attract and retain such personnel. Our future performance will depend upon the continued services of these persons.

As of March 31, 2017, we had 240 full time employees. Our future success substantially depends on our ability to recruit, hire, motivate, develop, and retain talented and skilled personnel and our

senior management. We believe that the inputs and experience of our senior management are valuable for the development of business and operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, see “Our Management” on page 142. There is no assurance, however, that these individuals or any other member of our senior management team will not leave us or join a competitor, in the future. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all.

8. Our Company’s management was changed in the Financial Year 2014-2015 and hence our Promoters have limited knowledge and records of litigations, disputes etc. of our Company.

In the Financial Year 2014-2015, the Promoters of our Company namely Jai Prakash Agarwal and Vishal Jain along with their PACs (Person Acting in Concert) namely Krishna Agarwal, Abhishek Agarwal, J. P. Agarwal & Sons (HUF), Rajendra Kumar Agarwal, Anita Agarwal and Shikha Jain purchased 3,69,910 Equity Shares of our Company vide share purchase agreement dated August 30, 2014. There may be certain old cases or disputes between our Company and other parties, which were initiated by or against the previous management. While the summary of pending litigations have been disclosed in the chapter titled “Outstanding Litigation and Defaults” beginning on page 239 of this Letter of Offer, we are not fully aware if there are any additional unknown legal proceedings to which our Company may be a party. The disclosures in this Letter of Offer pertaining to our Company’s litigations and legal matters are on the basis of information readily available from public domains and with our Company. There cannot be any assurance that our Company will not become liable in respect of the outcome of such unknown legal proceedings which may have adverse impact on the operations and financial conditions of our Company.

9. Our revenues are dependent on a limited number of our customers. The loss of any of our major Customers or a decrease in the volume of orders may adversely affect our revenues and profitability

At present, we derive most of our revenues from the orders received from the limited or few customers. In the Financial Year ended March 31, 2017, our top ten customers were contributing 21.77% of our Sales. Our business and results of operations will be adversely affected if we are unable to develop and maintain a continuing relationship with our key customer or develop and maintain relationships with other new customers. The loss of a significant customer or a number of significant customers due to any reason whether internal or external related to their business may have a material adverse effect on our business prospects and results of operations.

10. Work stoppages, shortage of labor and other labor related problems could adversely affect our business, and our operations are dependent on a large pool of contract labor and an inability to access adequate contract labor at reasonable costs at our factory may adversely affect our business prospects and results of operations.

We operate in a labor - intensive industry and hire contract labor at our factory. If we are unable to negotiate with the labor contractors or if there is any shortage or disruption in the availability of labor, it could result in work stops or increased operating costs as a result of higher than anticipated wages or benefits. We also require adequate supply of labor for the timely execution of our orders. Our supply of labor may be adversely affected by, among other things, work stoppages and labor disputes. Such events may also increase the price of labor. India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon their retrenchment. Further, there can be no assurance that we will have adequate access to skilled workmen at reasonable rates and in the area in which we operate. As a result, we may be required to incur additional costs to ensure timely execution of our projects. This may in turn affect our results of operations.

11. Some of our historical, legal and secretarial records are not traceable. Non-availability of these records exposes us to the risk of penalties that may be imposed by the competent regulatory authority in future.

Since our Company was incorporated more than 100 years ago, we have not been able to locate the records and data pertaining to certain historical, legal and secretarial records filed with the MCA/ RoC. While our Company believes that these records were duly filed with the MCA/ RoC on a timely basis but we are unable to obtain copies of these documents from the MCA/ RoC. Our Company cannot assure you that these form filings will be available in the future or that it will not be subject to imposition of penalty by any competent regulatory authority in this respect.

12. Profit after tax of our company have decreased in the past years

As per our restated audited standalone financial statements, the profits after tax of our Company have decreased from Rs. 268.99 lakhs in Financial Year 2014 to 54.26 lakhs in Financial Year 2015, from Rs. 54.26 lakhs in Financial Year 2015 to Rs. (194.59) lakhs in Financial Year 2016 and from Rs. (194.59) lakhs in Financial Year 2016 to Rs. (199.43) lakhs in Financial Year 2017. Our financial condition will be adversely affected if this downtrend continues in future.

13. You will not be able to immediately sell any of the Rights Equity Shares you purchase in this Issue on the Stock Exchange.

Under the SEBI ICDR Regulations, our Company is permitted to allot Rights Equity Shares within fifteen days of the Issue Closing Date. Consequently, the Rights Equity Shares you purchase in the Issue may not be credited to your dematerialized account with Depository Participants until fifteen days of the Issue Closing Date

14. There is no guarantee that the Rights Equity Shares issued pursuant to the Issue will be listed on the BSE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing of the Rights Equity Shares issued pursuant to the Issue will not be granted until after such Rights Equity Shares have been issued and allotted. Such approval will require all other relevant documents authorizing the issuing of Rights Equity Shares to be submitted. There could be a failure or delay in listing these Rights Equity Shares on the BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Rights Equity Shares.

15. The proposed new taxation system could adversely affect the Company's and its Group Companies business.

The Government has proposed three major reforms in Indian tax laws, namely the goods and services tax, the direct taxes code and provisions relating to general anti-avoidance rules ("GAAR"). Goods and services tax has been implemented from July 1, 2017. The goods and services tax has replaced the indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state value-added tax, surcharge and excise currently being collected by the central and state governments. The direct taxes code aims to reduce distortions in tax structure, introduce moderate levels of taxation, expand the tax base and facilitate voluntary compliance. It also aims to provide greater tax clarity and stability to investors who invest in Indian projects and companies, as well as clarify the taxation provisions for international transactions. It aims to consolidate and amend laws relating to all direct taxes such as income tax, dividend distribution tax, fringe benefit tax and wealth tax in order to facilitate voluntary compliance. With regard to the implementation of the direct tax code, the Government has not specified any timeline for its implementation.

With regard to GAAR, the provisions have been introduced by the Finance Act, 2012, and were scheduled to come into effect from April 1, 2013. However, in the Union Budget 2016, it was announced that modified provisions of GAAR will come into effect from the beginning of Financial Year 2017

The GAAR provisions are intended to catch arrangements declared as “impermissible avoidance arrangements”, which is defined in the Income Tax Act as any arrangement, the main purpose or one of the main purposes of which is to obtain a tax benefit. If GAAR provisions are invoked, then the tax authorities will have wide powers, including the denial of tax benefit or the denial of a benefit under a tax treaty. As the taxation system is intended to undergo a significant overhaul, the consequential effects on the Company cannot be determined as at the date of this Letter of Offer and there can be no assurance that such effects would not adversely affect the Company’s or its Group Entities’ business(es), financial condition(s), results of operations and the trading price of the Rights Equity Shares.

16. The Companies Act and SEBI Listing Regulations has effected significant changes to the existing Indian Company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

The Companies Act has been recently notified, except for certain provisions. The Companies Act has brought into effect significant changes to the Indian company law framework, and in certain cases, introduced certain requirements which did not have corresponding provisions under the Companies Act, 1956, such as provisions related to private placement of securities, disclosures in prospectus, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by Shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and Key Management Personnel from engaging in forward dealing. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps.

To ensure compliance with the requirements of the Companies Act and SEBI Listing Regulations, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

17. We have contingent liabilities not provided for Financial Year 2013, 2014, 2015, 2016 and 2017, quarter ended June 30, 2017 and our profitability could be adversely affected if any of these contingent liabilities materialize.

We had the following contingent liabilities not provided for in our Restated Standalone Financial Statements for Financial Year 2013, 2014, 2015, 2016 and 2017 and for the financial quarter ended June 30, 2017:

If these contingent liabilities materialize, fully or partly, this could have an adverse effect on our business, financial condition, results of operations and prospects. For further information on contingent liabilities, see “Financial Statements - Annexure XXII” on page 209.

18. Significant differences exist between Indian GAAP and other accounting principles, such as IFRS, which investors may be more familiar with and may consider material to their assessment of the Company’s financial condition.

As stated in the reports of the independent auditors included in this Letter of Offer, the Company’s financial statements are prepared and presented in conformity with Indian GAAP, which has been consistently applied during the periods stated, except as provided in such report. No attempt has been made to reconcile any of the information given in this Letter of Offer to any other principles or to base it on any other standards. Indian GAAP differs in certain significant respects from IFRS and other accounting principles and auditing standards with which prospective investors may be familiar in other countries. If the financial statements of the Company were to be prepared in accordance with such other accounting principles, its results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of the Company’s financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

19. We are a listed company and are required to comply with rules and regulations imposed by the Stock Exchange and SEBI with respect to continuous listing and the Companies Act. Any failure to comply with such rules and regulations or any wrong disclosure made to the Stock Exchange or any statutory authority could result in penalties being imposed on us, which may adversely affect our business and operations.

As a listed company, we are required to comply with certain conditions for continuous listing under the SEBI Listing Regulations and other rules and regulations imposed by SEBI, which require us to make certain periodic disclosures, including disclosures about any material events or occurrences with respect to our Company, disclosure of our financial statements and disclosure of our updated shareholding pattern. Any failure to comply with these continuous disclosure requirements or any wrongful disclosure made by us to the Stock Exchange or any other statutory authority may lead to penalties being imposed on us.

There have been, on number of occasions, inadvertent late filings done by our Company to BSE but so far, as on the date of filing of this letter of offer, we have not received any show cause notice from BSE and we have not been penalized on any occasion either by the BSE or any regulatory authority. While we believe, we are in compliance with rules and regulations imposed by the BSE and SEBI with respect to continuous listing, any failure to comply with such rules and regulations or any wrong disclosure made to the BSE or any statutory authority could result in penalties being imposed on us, which may adversely affect our business and operations.

20. Our Promoters do not have the experience of operating in the material handling equipment sector. Some of our promoters do not have adequate experience in, and have not actively participated in, business activities of our Companies.

Our Promoters do not have prior experience in the sector in which our Company operates. Our Promoters have not acquired any technical expertise which is required in our field. Our Company relies on the technical expertise of its employees. There can be no assurance that we will be successful in our business plans due to the lack of such direct experience of our Promoters.

Moreover, some of our Promoters, Krishna Agarwal (wife of promoter Jai Prakash Agarwal), Rajendra Kumar Agarwal (brother of promoter Jai Prakash Agarwal) and Anita Agarwal (wife of promoter Rajendra Kumar Agarwal), do not have experience in, and have not actively participated in, business activities undertaken by us. For further details of our Promoters, please see the chapter titled “Our Promoter and Promoter Group” beginning on page 154 of this Letter of Offer.

21. Our Company does not have any similar and comparable listed peer which is involved in same line of business for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

As on the date of this Letter of Offer, there are no comparable listed companies that are similar in size and nature and are involved in the same line of business, which are listed on the Indian stock exchanges and accordingly, we are not in a position to provide comparative analysis of our performance with any listed company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue

22. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company

Since the Issue size is less than Rs. 10,000 lakhs, there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. Therefore, the deployment of these funds raised through this Issue is at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financial results.

23. We have not entered into any agreement in respect of long term supply for raw materials required by us and as such we are susceptible to fluctuations in the cost of raw materials.

We are dependent on our suppliers for uninterrupted supply of raw-materials, such as battery, charger, steel, tyres, controller, hydraulic power pack and motor etc. We procure our supply of raw materials from various suppliers depending upon the price and quality of raw materials. While we are not dependent on any one particular supplier for supply of raw materials, any disruption of such supply of raw materials from our suppliers may adversely affect our operations and ability to deliver our products on a timely basis. Further, our profitability is partly dependent on our ability to anticipate and adapt to changes in the cost of raw materials. The prices of these raw materials are subject to price fluctuation due to various factors beyond our control, including but not limited to severe climatic conditions, governmental regulations, which may reduce supply and lead to increase in supply costs. In the event that we are unable to anticipate and adapt to changing supply costs by adjusting our purchasing practices or we are unable to negotiate favourable pricing terms with our suppliers for such raw materials, then our business, profitability and financial performance may be materially and adversely affected. Further, any disruption in the adequate and timely supply of raw materials or unavailability of raw materials may adversely affect our business and results of operations.

24. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

25. We are subject to risk of fraud, theft, embezzlement by our employees, contractors and customers, employee negligence or similar incidents may adversely affect our results of operations and financial condition

As of March 31, 2016, and March 31, 2017 we had total inventory consisting of raw materials, stock in process and finished goods to the value of Rs. 1,086.77 lakhs and Rs. 941.66 lakhs respectively as per our Restated Financial Statements. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking. We may also encounter some inventory loss on account of employee / contractor, theft, embezzlement and general administrative error. Although we have set up various security measures, including tagging our products, deployment of security guards and follow stringent operational processes such as periodic stock taking there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

26. Increased competition for skilled employees and salary increases for our employees may reduce our profit margin

Due to sustained economic growth in India and increased competition for skilled employees in India over the last few years, wages of skilled employees are increasing at a fast rate. Accordingly, we may need to increase our levels of employee compensation rapidly to remain competitive in attracting the quality of employees that our business requires. Increases in the compensation payable to our employees may reduce our profit margins and have a material and adverse effect on our results of operations.

27. Information relating to the estimated manufacturing capacity of our production facility included in this Letter of Offer is based on various assumptions and estimates. Actual production rate may vary from such estimated manufacturing capacity information and historical capacity utilization rates

The information relating to the estimated manufacturing capacity of our manufacturing facility included in this Letter of Offer are based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and potential operational efficiencies. Actual production levels and future capacity utilization rates may vary significantly from the estimated manufacturing capacity of our manufacturing facility and historical capacity utilization rates. Undue reliance should therefore not be placed on the manufacturing capacity information for our existing manufacturing facility proposed or the historical capacity utilization rate information included in this Letter of Offer. For more details, see "Our Business" on page 104 of this Letter of Offer.

28. A significant number of our offices, including our registered office and corporate office, are not registered in our name and are located on leased / rented premises. There can be no

assurance that these lease / rent agreements will be renewed upon termination or that we will be able to obtain other premises on lease / rent on same or similar commercial terms

A significant number of our offices, including our registered office and corporate office, are located on leased / rent premises, and we do not own any of these premises. In the event such leases / rent agreements are not renewed or are terminated, it could adversely affect our operation unless we arrange for similar premises. If we are unable to continue or renew such leases / rent agreement on same or similar terms, or find alternate premises on lease / rent on similar terms or at all, it may affect our business operations.

29. We cannot assure you that the deployment of the Net Proceeds in the manner intended by us will result in increase in the value of your investment

We intend to primarily use the Net Proceeds as described under “Objects of the Issue” on page 70. Our funding requirements and the deployment of the Net Proceeds are based on management estimates and have not been appraised by any bank, financial institution or other independent agency. In response to the dynamic nature of our business, our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in rescheduling of the proposed utilization of the Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management.

Further, pursuant to Section 27 of the Companies Act any variation in the objects for which an offer document has been issued would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects in accordance with Chapter VI-A of the SEBI ICDR Regulations. In the event of any such variation in the objects, the Promoters or controlling shareholders will provide an exit opportunity to such dissenting shareholders in accordance with the applicable provisions of SEBI ICDR Regulations.

Further, pending utilization of the Net Proceeds, we are required to invest the Net Proceeds for any interim period only in scheduled commercial banks listed under Schedule II of the Banking Regulation Act, 1949. We cannot assure you that we will earn significant interest income on, or that we will not suffer unanticipated diminution in the value of such interim investments.

30. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and manufacturing and engineering industry contained in this Letter of Offer.

While facts and other statistics in the Letter of Offer relating to India, the Indian economy and the manufacturing and engineering industry have been based on various government and private publications and reports from government and private agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials/information. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and therefore we make no representation as to their accuracy or completeness. These facts and other statistics are included in the chapter titled “Industry Overview” beginning on page 90 of this Letter of Offer. Due to possible flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be duly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

31. The success of the products manufactured by us depends on the success of the end product of our customer. Reduction in sales of the products of our customer, or defects in our customer's products which may be attributable to us, may adversely affect our business, financial condition, results of operations and prospects

The success of our business depends on the business growth and capex plan of our customers. The production and sales volumes of our customers as per the investment plan may be affected by a number of factors such as change in economic or industry conditions, change in regulatory requirements, government initiatives, products becoming obsolete or being phased out. Any decline in the demand for our customer's products may adversely affect the sales of our components to our customers and in turn may adversely affect our business, financial condition, results of operations and prospects. Further, any defect in our customer's products, which may be attributable to us, directly or indirectly, may also adversely affect our financial condition and prospects.

32. If we are unable to accurately forecast demand for our products, our business, cash flows, financial condition and prospects may be adversely affected

Our inability to forecast the level of customer demand for our products, as well as our inability to accurately schedule our raw material purchases and production and manage our inventory may adversely affect our business and cash flows from operations. We presently manufacture and supply products on a purchase order basis and order raw materials from suppliers based on customer forecasts and orders. In the event of any significant reduction or increase in demand for products by the customers with little or no advance notice, for any reason including our inability to meet customer requirements, product obsolescence, revision of products, etc., we may be unable to undertake corresponding production and inventory management, which may have an adverse effect on our inventory management costs and margins, thereby affecting our liquidity and operational costs.

33. Our indebtedness and failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may adversely affect our ability to conduct our business and operations

As per restated audited standalone financials, our aggregate secured borrowings from banks were Rs. 1,789.28 lakhs as on June 30, 2017. The agreements in respect of some of the debt contain certain covenants such as maintenance of financial ratios, compliance with reporting requirements and other restrictions which may significantly limit our ability to borrow additional money, make capital expenditure and investments etc. While there have not been any instances of non-compliances in relation to any of our debt facilities or any covenant therein, there can be no assurance that we will be able to comply with these covenants in the future or that we will be able to obtain the consents necessary to take the actions that may be necessary.

Our existing debt or additional debt that we may incur has, or may have, among others, the following consequences:

- limiting our ability to fund future working capital, capital expenditures and other general corporate requirements;
- requiring us to dedicate a substantial portion of our cash flow from operations to service our debt;
- limiting our flexibility to react to changes in our business and in the industry in which we operate;
- placing us at a competitive disadvantage with respect to any of our competitors who have less debt;
- requiring us to meet additional financial covenants; and

- Leading to circumstances that result in an event of default, if not waived or cured.

Any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities, affect our ability to raise additional funds or renew maturing borrowings to finance our existing working capital requirements and pursue our growth initiatives. We cannot provide any assurance that our business will generate cash in an amount sufficient to enable us to service our debt or to fund our other liquidity needs as they become due. The termination of, or declaration or enforcement of default under, any financing agreement may have an adverse effect on our business, financial condition, results of operations and prospects. For details of our indebtedness, see “Financial Indebtedness” on page 235

34. Any disruption in labor industry or strikes by our workforce may affect the production capability of our Company

Our manufacturing activities are labor intensive, and expose us to the risk of various labor related issues. We cannot assure you that we will not be subject to work stoppages, strikes, lockouts or other types of conflicts with our employees or contract workers in the future. Any such event, at our current facilities or at any new facilities that we may commission or acquire in the future, may adversely affect our ability to operate our business and serve our customers and impair our market reputation, which may adversely impact our business and financial condition.

35. Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances. A significant disruption at our manufacturing facility may adversely affect our production schedules, costs, revenue and ability to meet customer demand.

Our business involves manufacturing processes that can be potentially dangerous to our employees. We have faced past instances of accidents suffered by our employees in our manufacturing facility, while discharging their duties. An accident may result in loss of life, destruction of property or equipment, manufacturing or delivery delays, or may lead to suspension of our operations and / or imposition of liabilities.

While we believe we maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in, which may consequently have a negative effect on our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

36. The trademark used by us are not owned by us. Our ability to use our intellectual property including our logo may be impaired.

The brand names “Josts”, “Jowalk,” “Jotruck” and “Jumbodiesel,” that are used by our Company are not presently registered with the trademark registry. The trademark “Jumbo” though registered with trademark registry on our Company’s name has also been registered subsequently by the trademark registry in the name of one more company. For details, see “Government and Other Statutory Approvals” on page 247. We cannot assure you that these brands and trademark names will not be adversely affected in the future by events such as actions that are beyond our control, including customer complaints and dissatisfaction or adverse publicity from any other source. Further, we cannot assure you that we will continue to have the uninterrupted use and enjoyment of all brands and trademark names in the event that we are unable to register the said brands and trademarks with the trademark registry. Any damage to these brands and trademark names, can have an adverse effect on our business and results of operations.

37. We are subject to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations

We are subject to credit risk through our trade receivables and other receivables due from our customers. By their nature, trade receivables involve risks, including the risk of non-performance by counterparties. Further, the failure of any of our customers to make timely payments could affect our profitability and liquidity and decrease capital resources available to us for other uses. We may also be required to write off trade receivables or increase provisions made against our trade receivable. Any changes in the financial position of our customers that adversely affects their ability to pay us may in turn materially and adversely affect our cash flows, business prospects, financial condition and results of operations.

38. We outsource a portion of our manufacturing processes to certain sub-contractors, which presents numerous risks

We outsource some of our intermediate manufacturing and processing to various sub-contractors. We depend on the expertise of our sub-contractors to provide high quality components. There can be no assurance that we will be successful in continuing to receive uninterrupted and quality intermediate processes from our sub-contractors. Any disruption or inefficiencies in our supply chain network due to various reasons may adversely affect our delivery schedules and consequently our business and results of operations.

Below are the details of sub-contacts and labour charges as per the chapter titled “financial Information” of page 167 of this letter of offer

(Rs. In Lakhs)

Particulars	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017
Sales of goods/ services, as applicable	6843.60	6639.12	6991.26	7740.05	7772.21
Sub contract & Labour charges	105.22	70.46	67.28	86.20	90.61
Sub contract & labour charges % of revenue above	1.54%	1.06%	0.96%	1.11%	1.17%

39. Our business operations may be disrupted by an interruption in power supply, which may impact our business operations

Our manufacturing facility requires constant power supply and any disruption in the supply of power may disrupt our operations, which may interfere with manufacturing process requiring us to either stop our operations or repeat activities which may involve additional time and increase our costs. While we believe, we have adequate stand by power supply, this may not be adequate if the disruption in the supply of the power is for a longer period.

40. We face competition from competitors that may have greater financial and marketing resources. Failure to compete effectively may have an adverse impact on our business and results of operations.

We compete directly and indirectly with other manufacturers and suppliers of material handling equipment's on performance, customer service and support, price and brand recognition. Increased competition may force us to improve our service capabilities or lower our prices or result in loss of customers, which may adversely affect our profitability and market share.

Some of our competitors may have greater capital, marketing, technological and other resources, which may enable them to commit larger amounts of capital in response to changing market conditions, or to achieve substantially more market penetration in certain segments of those markets in which we operate or to anticipate the course of market developments and trends more effectively than we do and develop capabilities that may render our processes obsolete or put us at a disadvantage. We may also face competition from new entrants in the market as well as aggressive pricing and marketing strategies by other manufacturers trying to gain market share. Any exclusive arrangements between suppliers of raw materials and our competitors may also increase our operating costs.

We believe that it is difficult to predict how the competitive landscape of our industry will develop over the long term. General competitive factors in the market, which may affect the level of competition over the short and medium term, include time to market, quality, price, timely delivery, warranty and general customer experience.

41. Our insurance coverage may not adequately protect us from all material risks and liabilities

We maintain insurance which we believe is typical in our industry in India and in amounts which we believe to be commercially appropriate for risks, including group insurance and personal accident insurance. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies. Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable.

The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities and losses. Further, despite such uninsured losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any such uninsured losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

42. Breakdown of machinery and / or equipment used for the purpose of manufacturing process.

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing process, may delay the production process as a whole and result in missing deadlines in delivery of product if we are unable to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

43. Some of our Directors who are Promoters including one Independent Director have interests other than reimbursement of expenses incurred and normal remuneration or benefits in our Company.

Our Directors who are Promoters namely, Jai Prakash Agarwal, Vishal Jain and Shikha Jain and one Independent Director namely Marco Wadia are interested in our Company to the extent of Equity Shares held by them in the Company, and any dividends, bonuses or other distributions on such Equity Shares. For details, see “Our Management”, “Our Promoter and Promoter Group” and “Financial Statements” on pages 142, 154 and 167, respectively.

44. We have entered and will continue to enter into related party transactions

We have entered into and may in the course of our business continue to enter into transactions specified in the restated financials contained in the Letter of Offer with related parties. For further details in relation to our related party transactions, see “Related Party Transactions” on page 165. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. The Companies Act has brought into effect significant changes to the Indian company law framework, including specific compliance requirements such as obtaining prior approval from audit committee, the board of directors and shareholders for certain related party transactions. There can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our financial condition and results of operations.

45. Our ability to pay dividends in the future will depend inter alia upon available financial resources, investment requirements and taking into account optimal shareholder return

Our ability to pay dividends to our shareholders in the future will depend, inter alia, upon available financial resources, investment requirements and taking into account optimal shareholder return. For details of the dividends paid by our Company, in the last five Financial Years see “Dividend Policy” on page 166. The amounts paid as dividends in the past are not necessarily indicative of the dividend policy of our Company or dividend amounts, if any, in the future. There is no guarantee that any dividend will be declared or paid or that the amount thereof will not be decreased in the future.

46. We have experienced negative cash flows in prior periods and may continue to do so in the future, which could have a material adverse effect on our business prospects, financial condition, cash flows and results of operations

We have experienced negative net cash flows in the recent periods, the details of which, as per our Restated Audited Standalone Financial Information, are provided below:

Particulars	Rs in lakhs					
	March 31, 2013	March 31, 2014	March 31, 2015	March 31, 2016	March 31, 2017	June 30, 2017
Net Cash (used in) / from operating activities	156.31	220.98	20.98	(317.34)	(370.98)	210.58
Net Cash from / (used in) investing activities	(88.59)	0.90	(24.55)	(98.50)	(138.08)	84.48
Net Cash from / (used in) financing activities	(55.10)	(268.10)	(3.21)	387.55	509.59	382.87
Net increase / (decrease) in cash and cash equivalents	12.63	(46.22)	(6.78)	(28.29)	0.53	87.81

Our inability to generate and sustain adequate cash flows in the future could adversely affect our results of operations and financial condition. For more information, please see the sections titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Financial Information” on pages 226 and 167, respectively.

47. The Promoter Group of our Company does not include certain relatives of our Promoters and / or entities in which these persons may have any interest.

The Promoter Group of our Company does not include certain relatives of our Promoters and / or any entities in which they jointly or severally may have an interest. The aforesaid relatives fall under the definition of “immediate relatives” as per the SEBI ICDR Regulations but, as such, do not form part of the “Promoter Group” and nor do they hold any equity shares in our Company. Our Promoters vide letter dated June 29, 2017 has submitted that information related to business / financial interest held by the said relatives is not accessible for the purpose of disclosure in the Draft Letter of Offer / Letter of Offer. Thus, these immediate relatives are treated as disassociated from the promoter group though there are no formal disassociation agreements with them. Therefore, the disclosures made in this Letter of Offer are limited to the extent of information that has been made available in relation to Promoter Group and Group companies. For further details, please refer to chapters titled “Our Promoter and Promoter Group” and “Our Group Companies” beginning on pages 154 and 162 respectively of this Letter of Offer.

48. Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be impaired

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, will make the document inadmissible in legal proceedings. Any potential dispute vis-à-vis non-compliance of local laws relating to stamp duty and registration may adversely impact the continuity of our business activity.

49. Our Company has not made any provision for decline or revalued in value of investment of the Company

As on March 31, 2017, our Company has made an investment in equity shares of The Zoroastrian Co-operative Bank Ltd. for a consideration of Rs. 1.00 lakh. Further, our Company has also made investment in Mutual Funds and the market value of it is Rs. 11.03 lakhs as on March 31, 2017. We have not made any provision for this increase or decrease in the value of investments, if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an adverse impact on our results of operations and financial conditions.

50. We require number of approvals, licenses, registrations and permits for our business and failure to obtain or renew them in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. While we believe that we will be able to obtain the required permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any or all requisite permits or approvals in the time frame anticipated by us, or at all. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please refer to the section titled "Government and Other Statutory Approvals" on page 247.

51. Our Promoters and Promoter Group may continue to hold majority shareholding after the completion of the Issue.

Our Promoters and Promoter Group holds 48.50% of our issued, paid-up and subscribed Equity Share capital as on the date of this Letter of Offer. Accordingly, our Promoters and Promoter Group will continue to exercise control over us, including being able to influence the composition of our Board and influence matters requiring shareholder approval. Our Promoters and Promoter Group may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. Through their influence, our Promoter and Promoter Group may be in a position to delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. For further details, please see the section titled “Capital Structure” on page 56

52. Our Promoters may take actions that are not in the best interests of the investors and the value of the Rights Equity Shares may be adversely affected.

Our Promoters have had, and will continue to have, the ability to exercise a controlling influence over the business. This significant control by our Promoter could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company, even if such corporate event is in the Company’s best interest. As a result, the value of the Rights Equity Shares may be adversely affected.

EXTERNAL RISK FACTORS

53. General economic conditions in India and globally could adversely affect the business and results of operation of our Company

Our results of operations and financial condition depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our business, financial performance and operations

We mainly derive revenue from our operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India’s sovereign debt rating or a decline in India’s foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. A slowdown in the Indian economy could adversely affect the policy of the GoI towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy. A loss of investor confidence in other emerging

market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business and results of operations and the market price of the Equity Shares.

54. Companies operating in India are subject to a variety of taxes and surcharges.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty, tax on dividends and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business, cash flows and results of operations.

55. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect an Equity Shareholder's ability to sell, or the price at which an equity shareholder can sell the Equity Shares at a particular point in time.

Our Company is subject to a daily circuit breaker imposed on listed companies by BSE which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares may be adversely affected.

56. Any future issuance of the Equity Shares may dilute your future shareholding and sale of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future equity issuances by our Company may lead to dilution of your future shareholding in our Company. Any future equity issuances by our Company or sale of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Share. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Share.

Except as otherwise stated in this Letter of Offer, there is no restriction on our Company's ability to issue the Securities or the relevant shareholders' ability to dispose of their Equity Share, and there can be no assurance that our Company will not issue Equity Share or that any such shareholder (including Promoters and Promoter Group) will not dispose of, encumber, or pledge its Securities.

57. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction and also at the time of purchase in certain cases. STT will be levied on and collected

by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than twelve (12) months, which are sold other than on a recognized stock exchange and on which no STT has been paid to an Indian resident, will be subject to long term capital gains tax in India.

Further, any gain realized on the sale of listed equity shares held for a period of twelve (12) months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

58. Political instability or significant changes in the economic liberalization and deregulation policies of the Government or in the government of the states where the Company operates could disrupt its business.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. The Company's businesses, and the market price and liquidity of its securities may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments in or affecting India. In recent years, India has been following a course of economic liberalization and the Company's business could be significantly influenced by socio-economic policies followed by the Government.

However, there can be no assurance that such policies will continue in the future. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

59. Natural disasters could have a negative impact on the Indian economy and damage the Company's facilities.

The Company's manufacturing facilities are vulnerable to natural disasters. In addition, natural disasters such as floods, earthquakes, epidemics or famines have in the past had a negative impact on the Indian economy. If any such event were to occur, the Company's business could be affected due to the event itself or due to its inability to effectively manage the effects of the particular event. Potential effects include the damage to infrastructure and the loss of business continuity, business information or inventories of raw materials or finished goods. Thus, any disruption in operations at our facility possessing equipment could have a material adverse effect on the Company's ability to provide products to its customers, and thus materially and adversely affect the Company. The recent currency demonetization measures imposed by the Government of India may adversely affect our business and the Indian economy.

60. Any anticipated measures undertaken by the Government of India or any regulatory authority such as the recent demonetization measures may adversely affect our business, financial condition and results of operations.

On November 8, 2016, the Indian government announced phasing out of large-denomination currency notes (Rs. 500 and Rs. 1,000, representing 86% of the total currency in circulation) as legal tender. They were immediately replaced with new Rs. 500 and Rs. 2,000 currency notes. This measure was undertaken to curb corruption, tax evasion, and counterfeiting. The withdrawal from circulation started immediately and ended on December 30, 2016. Unexpected demonetization weighed on growth in the third quarter of financial year 2016 - 17. Any such anticipated measures undertaken by the Government of India or any regulatory authority may adversely affect our business, financial condition and results of operations.

61. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Rights Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of the SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

62. Financial instability in Indian financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in Asian emerging market countries. Financial turmoil in global economy in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

63. The price of the Rights Equity Shares may be volatile.

The trading price of our Rights Equity Shares may fluctuate after the Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's financial regime, volatility in the Indian and global securities market, performance of our competitors, the Indian material handling equipment industry and the perception in the market about investments in the material handling equipment industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our equity shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our equity shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our equity shares.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

GLOBAL VIEW

Introduction

For India, three external developments are of significant consequence:

In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India's capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight.

Second, the medium-term political outlook for globalisation and in particular for the world's "political carrying capacity for globalisation" may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on ongoing trends documented widely about stagnant or declining trade at the global level. This changed outlook will affect India's export and growth prospects.

Third, developments in the US, especially the rise of the dollar, will have implications for China's currency and currency policy. If China is able to successfully re-balance its economy, the spillover effects on India and the rest of the world will be positive. On the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill over for India. For China, there are at least two difficult balancing acts with respect to the currency.

Domestically, a declining currency (and credit expansion) prop up the economy in the short run but delay rebalancing while also adding to the medium-term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China's ambitions to establish the yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

INDIAN ECONOMY AT A GLANCE

Overview of the Indian Economy

With demonetisation, a radical governance-cum-social engineering measure was enacted on November 8, 2016. The two largest denomination notes, Rs 500 and Rs 1,000 together comprising 86 percent of all the cash in circulation were "demonetised" with immediate effect, ceasing to be legal tender except for a few specified purposes. These notes were to be deposited in the banks by December 31, while restrictions were placed on cash withdrawals. In other words, restrictions were placed on the convertibility of domestic money and bank deposits.

The aim of the action was fourfold:

- to curb corruption,
- counterfeiting,
- the use of high denomination notes for terrorist activities, and
- especially the accumulation of "black money", generated by income that has not been declared to the tax authorities

Review of Developments in 2016 -17

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms' spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were:

- (i) moderation in industrial and non-government service sectors;
- (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and
- (iii) strong growth in public administration and defence services dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 per cent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1a).

Inflation this year has been characterized by two distinctive features as shown in Figure 2.

- (i) The Consumer Price Index (CPI) - New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful.
- (ii) The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at the end of December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-) 5.1 percent in August 2015 to 3.4 percent at the end of December 2016 as shown in Figure 2, on the back of rising international oil prices.

Figure 2. WPI and CPI Inflation

Source: CSO

(Source-Economic Survey 2016-17; www.indiabudget.nic.in)

The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation

INDIAN MANUFACTURING SECTOR

Introduction

Manufacturing has emerged as one of the high growth sectors in India. The Government of India had launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. India is expected to become the fifth largest manufacturing country in the world by the end of year 2020.

Market Size

India's manufacturing sector has the potential to touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country's GDP and create up to 90 million domestic jobs by 2025. Business conditions in the Indian manufacturing sector continue to remain positive.

Investments

With the help of Make in India drive, India is on the path of becoming the hub for hi-tech manufacturing as global giants such as GE, Siemens, HTC, Toshiba, and Boeing have either set up or are in process of setting up manufacturing plants in India, attracted by India's market of more than a billion consumers and increasing purchasing power.

Foreign Direct Investment (FDI) inflows in India's manufacturing sector grew by 82 per cent year-on-year to US\$ 16.13 billion during April-November 2016. India has become one of the most attractive destinations for investments in the manufacturing sector.

INDIAN ENGINEERING SECTOR

Introduction

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India on its quest to become a global superpower has made significant strides towards the development of its engineering sector. The Government of India has appointed the Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products and services

from India. India exports transport equipment, capital goods, other machinery/equipment and light engineering products such as castings, forgings and fasteners to various countries of the world. India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

The capital goods & engineering turnover in India is expected to reach US\$ 125.4 billion by FY 2017. India exports its engineering goods mostly to the US and Europe, which accounts for over 60 per cent of the total exports. Recently, India's engineering exports to Japan and South Korea have also increased with shipments to these two countries rising by 16 and 60 per cent respectively. Sri Lanka, Nepal and Bangladesh have also emerged as the major destinations for India's engineering exports. Engineering exports from India increased for the sixth straight month at 12.4 per cent year-on-year to US\$ 5.3 billion in January 2017, outperforming that of the overall merchandise export.

Investments

The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing costs, technology and innovation. The above, coupled with favourable regulatory policies and growth in the manufacturing sector has enabled several foreign players to invest in India.

The foreign direct investment (FDI) inflows into India's miscellaneous mechanical and engineering industries during April 2000 to December 2016 stood at around US\$ 3,296.07 million, as per data released by the Department of Industries Policy and Promotion (DIPP). In the recent past, there have been many major investments and developments in the Indian engineering and design sector:

Details of the Objects

1. Investment in our subsidiary, MHE

We propose to utilize Rs. 180 lakhs from the Net Proceeds towards part-financing of purchase of material handling equipment's for the purpose of carrying on equipment's rental business. We propose to part-finance this purchasing of equipment's through equity investment in MHE, a subsidiary of our Company. Board of Directors of our Company has acquired MHE vide board resolution dated March 21, 2017. The rationale behind acquiring MHE is that it would be advantageous for our Company to acquire controlling interest in MHE by acquiring 60.00% equity shares of MHE so that our Company can expand its operations in rental business of material handling equipment. The acquisition and the business is a logical next level expansion of the Company into an area where the Company have been in operation for last 100 years. The balance 40% of the equity capital and further infusion towards the equity capital of MHE would be made by Mr. Jai Prakash Agarwal and Mr. Vishal Jain, promoters of the Company in equal proportion. To this effect, the Committee of the Directors constituted by the Board of Directors on July 20, 2017 have accepted the proposal of the Company to further capitalize MHE equity infusion of Rs. 180 lakhs. The Company have already contributed an amount of Rs. 120 lakhs out of its total committed capital infusion of Rs. 300 lakhs.

Conducting business of providing equipment's on rental basis requires considerable amount of time and effort including purchase of equipment's, hiring manpower and getting various regulatory approvals from government authorities and developing the infrastructure to enable our subsidiary company to carry on the rental business.

The estimated fund requirement for the purpose of conducting rental business being undertaken by our subsidiary is Rs. 500.00 lakhs and it shall be financed by the following means:

Sr. No.	Source	Amount (Rs. In Lakhs)
1.	Capital infused out of internal resource	120.00
2.	Capital contribution of Mr. Vishal Jain	40.00
3.	Capital contribution of Mr. Jai Prakash Agarwal	40.00
4.	Out of proceeds from the rights issue	180.00
5.	Proposed investment by Mr. Jai Prakash Agarwal	60.00
6.	Proposed investment by Mr. Vishal Jain	60.00
	Total	500.00

The net proceeds will be utilized to augment the capital base of MHE Rentals to meet its capital requirements arising out of the growth in the material handling rental business. The investment is proposed to be undertaken by way of subscription to the equity shares of MHE Rentals for an aggregate equity amount of Rs. 500 lakhs proportionately by our Company, Jai Prakash Agarwal and Vishal Jain in the ratio of 60:20:20 respectively.

No dividends have been assured to our Company by MHE Rentals for the purposes of the investment. The investment will result in the increase in the value of the investment made by our Company in MHE Rentals. We believe, our Company will benefit by appreciation in the value of the investment bases on the performance of MHE Rentals.

The Board of Directors at its meeting held on July 20, 2017 has approved a borrowing proposal of Rs. 2.78 crores from M/s. SREI Equipments Finance Limited. The balance debt funding arrangement with lenders are under process.

Means of finance

GLOBAL VIEW

Introduction

For India, three external developments are of significant consequence:

In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India's capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight.

Second, the medium-term political outlook for globalisation and in particular for the world's "political carrying capacity for globalisation" may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on ongoing trends documented widely about stagnant or declining trade at the global level. This changed outlook will affect India's export and growth prospects.

Third, developments in the US, especially the rise of the dollar, will have implications for China's currency and currency policy. If China is able to successfully re-balance its economy, the spillover effects on India and the rest of the world will be positive. On the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill over for India. For China, there are at least two difficult balancing acts with respect to the currency.

Domestically, a declining currency (and credit expansion) prop up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China's ambitions to establish the yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

Global Economic Overview

The external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election

and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at the end of January 2016 to US\$ 360 billion at the end of December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments.

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term.

Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region

Global View for Growth

Central Statistics Office (CSO) in its first Advance Estimation (AE) estimated the economy to grow by 7.1 per cent in the current year. However, it has stated that these numbers have been projected taking into account the information for first seven to eight months. It is therefore unlikely to have captured the impact of withdrawal of the high denomination currency. Although it is difficult to precisely pinpoint the impact on GDP, in all likelihood, the growth numbers of GDP, GVA, etc. could be revised downwards in the subsequent revisions to be carried out by the CSO. Inflation could also be lower than what comes out from the implicit GDP deflator underlying the CSO's first AE for 2016-17.

For 2017-18, it is expected that the growth would return to normal as the new currency notes in required quantities come back into circulation and as follow up actions to demonetisation are taken. Helping to maintain the momentum of such growth will be factors like possible normal monsoon, an increase in the level of exports following the projected increase in global growth and above all various reform measures taken by the Government to strengthen the economy. Some possible challenges to growth exist. For example, the prices of crude oil have started rising and are projected to increase further in the next year. Estimates suggest that oil prices could rise by as much as one sixth over the 2016-17 level, which could have some dampening impact on the growth. Fixed investment rate in the economy has consistently declined in the past few years, more so the private investment. Raising the growth rate of the economy will to a great extent depend on quickly reversing this downward trend in the investment. The last few years have also witnessed a slowdown in global trade and investment flows.

Although, India has not been particularly affected by this slowdown, lower growth in foreign portfolio investment cannot be ruled out, partly on account of the fact that the interest rates in the United States have begun to increase. On balance, there is a strong likelihood that Indian economy may recover back to a growth of 6¾ per cent to 7½ per cent in 2017-18.

INDIAN ECONOMY AT A GLANCE

Overview of the Indian Economy

With demonetisation, a radical governance-cum-social engineering measure was enacted on November 8, 2016. The two largest denomination notes, Rs 500 and Rs 1000 together comprising 86 percent of all the cash in circulation were “demonetised” with immediate effect, ceasing to be legal tender except for a few specified purposes. These notes were to be deposited in the banks by December 30, while restrictions were placed on cash withdrawals. In other words, restrictions were placed on the convertibility of domestic money and bank deposits.

The aim of the action was fourfold:-

- to curb corruption,
- counterfeiting,
- the use of high denomination notes for terrorist activities, and
- especially the accumulation of “black money”, generated by income that has not been declared to the tax authorities

Review of Developments in 2016 -17

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms’ spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were:

- (i) moderation in industrial and non-government service sectors;
- (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and
- (iii) strong growth in public administration and defence services dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 per cent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1a).

Inflation this year has been characterized by two distinctive features as shown in Figure 2.

- (i) The Consumer Price Index (CPI) - New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful.
- (ii) The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at the end of December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-) 5.1 percent in August 2015 to 3.4 percent at the end of December 2016 as shown in Figure 2, on the back of rising international oil prices.

The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation

As per the first advance estimates of the CSO, growth rate of the industrial sector comprising mining & quarrying, manufacturing, electricity and construction is projected to decline from 7.4 per cent in 2015-16 to 5.2 per cent in 2016-17. During April - November 2016-17, a modest growth of 0.4 per cent has been observed in the Index of Industrial Production (IIP) which is a volume index with base year of 2004-05. This was the composite effect of a strong growth in electricity generation and moderation in mining and manufacturing. In terms of use-based classification, basic goods, intermediate goods and consumer durable goods attained moderate growth.

Conversely, the production of capital goods declined steeply and consumer nondurable goods sectors suffered a modest contraction during

38 per cent in the IIP registered a cumulative growth of 4.9 per cent during April-November, 2016-17 as compared to 2.5 per cent during April-November, 2015-16.

The production of refinery products, fertilizers, steel, electricity and cement increased substantially, while the production of crude oil and natural gas fell during April-November, 2016-17. Coal production attained lower growth during the same period.

Outlook for Growth

The growth in 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government. India's exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF's January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points.

On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetisation-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on housing and consumer durables and semi durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetisation against the medium-term necessity of adhering to fiscal discipline and the need to be seen as doing so.

Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast.

First, the extent to which the effects of demonetisation could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses was in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room

for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geo-politics or currency movements. This could reduce global growth and trigger capital flight from emerging markets.

The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

MANUFACTURING SECTOR

Manufacturing Growth

World manufacturing output growth improved slightly during the final quarter of 2016. Fourth quarter figures show that the improvement is primarily attributable to the continuing recovery process in industrialized economies. However, manufacturing output growth further slowed down in developing and emerging industrial economies. Although the overall growth trend in world manufacturing was positive in the second half of 2016, geopolitical uncertainty remained high and potential changes in global trade arrangements may create new risks.

Against the backdrop of sluggish dynamics, world manufacturing output rose by 2.7 per cent in the fourth quarter of 2016 compared to the same period of the previous year, which is higher than the 2.3 per cent rise in the third quarter and represents the strongest performance since the beginning of the year. A slightly decelerated growth rate observed in developing and emerging industrial economies during the final quarter of 2016 was compensated by a more positive picture in industrialized countries as their growth performance improved. However, the level of growth in developing economies has been consistently higher than in industrialized countries, as depicted in Figure 1.

Major industrialized economies with significant contributions to global manufacturing output, namely the United States, Japan, Germany, the Republic of Korea and United Kingdom, recorded an expansion compared to the same period of the previous year. In China, the world's largest manufacturer,

comparably lower growth rates have now become more prevalent, thus pushing the average industrial growth of emerging industrial economies downward.

The manufacturing output of industrialized economies increased to 1.4 per cent in the fourth quarter of 2016 from the 0.5 per cent recorded in the previous quarter. This increase is primarily attributable to the performance of East Asia, which experienced a significant reversal in growth in the second half of 2016, following several consecutive slumps that have lasted for nearly two years. The main force driving this nearly 2.9 per cent year-by-year upturn is Japan, East Asia's major manufacturer, whose export-fuelled growth was also supported by a weakened yen against the US dollar. Production in Europe witnessed a healthy growth momentum at the end of 2016, and had a positive impact on the manufacturing growth of industrialized countries as a whole. By contrast, the growth of North America's manufacturing output remained stagnant in the fourth quarter of 2016 and recorded a negligible gain of 0.2 per cent. The manufacturing output of developing and emerging industrial economies rose by merely 4.4 per cent. This was the first time the growth of these economies was below 5.0 per cent since the beginning of 2015.

Asian economies maintained a relatively higher growth rate at 5.5 per cent, but their growth performance hit a multi-year low in the final quarter of 2016. Other regions' production slightly decreased compared to the same period of 2015: by 1.0 per cent in Latin America and 0.5 per cent in Africa. As long as economic and political instability persists in industrialized countries, the threat of another slowdown remains looming over developing economies.

Industrialized economies

The manufacturing output growth of industrialized economies improved in the last quarter of 2016 from 0.5 per cent in the third quarter to 1.4 per cent. This acceleration was characterized by an upward trend in East Asia and Europe. Manufacturing growth experienced a moderate, albeit noticeable slowdown in North America. Among the industrialized country group, Europe's manufacturing output grew by 1.6 per cent in the final quarter of 2016, while the eurozone registered a growth rate of 1.7 per cent.

The growth trends for these two groups converged and nearly merged at the end of 2016, displaying a fairly balanced resistance and response to adverse impacts. When comparing year-to-year developments among the leading eurozone economies, Italy registered a 2.8 per cent growth rate followed by Germany with a growth rate of 1.2 per cent, while a more moderate growth rate of 0.2 per cent was observed in France. The growth figures for the majority of eurozone countries were positive, with strong growth performance observed in Slovenia - the fastest growing manufacturer among all eurozone countries in 2016. Manufacturing output rose by 2.0 per cent and more in Lithuania, Finland, the Netherlands and Ireland, while Portugal's dropped by 0.6 per cent. Beyond the eurozone, the manufacturing production in the United Kingdom recorded a positive growth rate in the final quarter of 2016 at 1.9 per cent, despite an expected slowdown in the aftermath of Brexit. Manufacturing output in the Russian Federation grew by a moderate rate of 1.0 per cent, continuing its shaky recovery after the country's economy was severely hit by the drop in oil prices. The pace of growth remained slow in Czechia and Hungary due to the reduction in EU investment funds and even less positive results came from

Switzerland, where manufacturing output dropped by 1.6 per cent compared to the same period of the previous year.

Overall manufacturing production in North America grew by 0.2 per cent compared to the fourth quarter of the previous year. The still strong dollar made American-made goods more expensive and less competitive compared to foreign produced goods, which led to weak exports and subsequently to a negligible 0.2 per cent improvement in total manufacturing output in the United States on a year-to-year basis. Positive growth was reported in the production of motor vehicles, computers, electronic and optical products, but the majority of manufacturing industries reported a decline.

In Canada, manufacturing growth in the fourth quarter of 2016 varied considerably by industry. While the production of pharmaceuticals and chemicals remained strong, production in fabricated metal products and in the automotive industry dropped. Aggregated growth of manufacturing output in Canada was 0.2 per cent in the fourth quarter of 2016. The disruption of a long period of consecutive contraction in the industrialized East Asian economies was confirmed by a positive result in the fourth quarter of 2016 - nearly 2.9 per cent improvement was observed compared to the fourth quarter of 2015. A major force stimulating this change was Japan, which recorded a positive growth rate of 2.7 per cent following a nearly two-year period of consecutive slumps, except for the last quarter, when the first signs of improvement arose.

This upswing is primarily attributable to the boost in all three key sectors in Japan - the automotive industry, computers, electronic and optical products and machinery and equipment. Taking advantage of the weakening yen and a pickup in global trade, manufacturing production in the Republic of Korea witnessed a gain of 1.7 per cent. Malaysia's total manufacturing output recorded a 4.9 per cent rise in the fourth quarter of 2016 on a year-to-year basis, and very strong growth figures were also observed in Singapore. Despite this overall improvement, global growth still looks fragile due to the uncertainty in Europe generated by Brexit and the upcoming U.S. secession from the Trans-Pacific Partnership. On the other hand, a new free-trade agreement between the EU and Canada looks promising for the manufacturing of a number of countries

Developing and Emerging Industrial Economies

The overall growth of manufacturing output in developing and emerging industrial economies was affected by gloomy signals emanating from the major economies in this group. Although manufacturing activity in China continued to expand, its pace slowed compared to the previous quarter. In the final quarter of 2016, manufacturing production in China rose by 6.1 per cent over the same period of the previous year, reflecting a slowdown from the 6.9 per cent growth rate recorded in the previous quarter. This slightly steeper deceleration was mainly driven by negative growth in the production of basic metals, China's strongest industry. Following an uninterrupted downward trajectory since late 2013, the trend in China now seems to point towards stabilization at a sustainable pace.

Latin American economies, which have recently faced a severe decline due to subdued global demand, low commodity prices and domestic political turbulence, have reduced their declining growth rate to 1.0 per cent. On a sequential basis, the fall in manufacturing activity in Brazil has softened throughout 2016, dropping only by 2.9 per cent in a year-to-year comparison in the final quarter of 2016. The largest expansion was seen in the manufacturing of motor vehicles, closely followed by manufacturing of computer, electronic and optical products. Other larger Latin American manufacturers, namely Mexico and Colombia, recorded a positive growth of 2.0 per cent and 1.5 per cent, respectively, while Argentina, Chile and Peru experienced contractions. Growth performance was much higher in Asian economies, where manufacturing output rose by 5.5 per cent in the fourth quarter of 2016, a decent result considering that the production growth rate of Asian developing economies has not dropped below 6.0 per cent since the global financial crisis. Vietnam again confirmed its position as one of the fastest growing Asian economies with a 9.6 per cent gain, benefiting mostly from its attractiveness for foreign direct investment and export oriented industries. Indonesia's manufacturing output expanded by 2.3 per cent in a year-by-year comparison, decelerating from much higher growth rates recorded in previous quarters, while India's manufacturing production output ended the year with a trivial, barely 0.5 per cent rise, the first positive growth figure registered in 2016. According to UNIDO estimates, positive developments were observed in other Asian economies: manufacturing output rose by 3.6 per cent in Saudi Arabia, almost 4.0 per cent in Pakistan and 1.3 per cent in Jordan. Bangladesh managed to maintain its robust growth in the fourth quarter of 2016, while manufacturing output in Mongolia contracted.

Estimates based on the limited available data indicate that manufacturing output in Africa decreased by 0.5 per cent in the final quarter of 2016. In terms of individual countries, a 0.6 per cent drop was registered in South Africa, the region's most industrialized economy. Egypt and Tunisia's manufacturing output also decreased compared to the same period of the previous year, while Morocco and Cote d'Ivoire registered a positive growth rate according to UNIDO estimates. Among the other developing economies, the manufacturing output of East European countries achieved relatively higher growth rates. Manufacturing output rose by 4.1 per cent in Poland, 4.7 per cent in Romania, 4.3 per cent in Bulgaria and over 5.0 per cent in Serbia and Croatia. Manufacturing production in Turkey grew by 1.4 per cent, reversing the decline registered in the previous period.

Key findings

Global manufacturing production maintained a positive growth in nearly all industries in the final quarter of 2016. High- and medium-high-technology manufacturing industries held top positions, when looking at the year-by-year developments - the manufacture of computers, electronics and optical products grew by 6.3 per cent, the manufacture of motor vehicles rose by 6.2 per cent and the production of pharmaceutical products by 4.0 per cent. However, the production of other transport equipment, another high-technology sector, contracted by 0.9 per cent compared to the same period of the previous year. The largest loss was recorded in the tobacco industry, with its global production declining by 5.8 per cent.

Figure 4: Estimated growth rates by Industry in % compared to previous year Quarter IV, 2016

As regards durable and capital goods, the production of machinery and equipment experienced an exceptionally high growth rate at 3.7 per cent in the fourth quarter of 2016. The manufacture of non-metallic mineral products, which essentially supply construction materials, registered a growth figure of 2.5 per cent worldwide. The manufacture of fabricated metal products and furniture both rose at a moderate pace of 1.7 per cent. Worldwide manufacturing of basic metals has systematically lost strength over the last few years and reached a negative growth rate of 0.7 per cent in the fourth quarter of 2016, mostly due to a visibly decreased production of basic metals in China.

Global manufacturing output maintained relatively high growth rates in the production of basic consumer goods. The manufacture of food products rose by 3.1 per cent and beverages by 3.7 per cent, while the manufacture of wearing apparel increased by 0.5 per cent only. In low-technology manufacturing sectors, the global production of wood products rose by 3.3 per cent while the growth pace of manufacturing of paper products, textiles and leather products remained below 2.0 per cent.

The growth performance of developing and emerging industrial economies outperformed industrialized economies in nearly all manufacturing industries, including a number of high-technology industries, as illustrated in the above Figure. The fastest growing industry in both country groups was the automotive industry, reflecting strong growth of automobile production in China as well as in European countries

INDIAN MANUFACTURING SECTOR

Introduction

Manufacturing has emerged as one of the high growth sectors in India. The Government of India had launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. India is expected to become the fifth largest manufacturing country in the world by the end of year 2020.

Market Size

India's manufacturing sector has the potential to touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country's GDP and create up to 90 million domestic jobs by 2025. Business conditions in the Indian manufacturing sector continue to remain positive.

Investments

With the help of Make in India drive, India is on the path of becoming the hub for hi-tech manufacturing as global giants such as GE, Siemens, HTC, Toshiba, and Boeing have either set up or are in process of setting up manufacturing plants in India, attracted by India's market of more than a billion consumers and increasing purchasing power.

Foreign Direct Investment (FDI) inflows in India's manufacturing sector grew by 82 per cent year-on-year to US\$ 16.13 billion during April-November 2016. India has become one of the most attractive destinations for investments in the manufacturing sector.

Government Initiatives

In a bid to push the 'Make in India' initiative to the global level, Government of India pitched India as a manufacturing destination at the World International Fair in Germany's Hannover in 2015 and showcased India as a business friendly destination to attract foreign businesses to invest and manufacture in the country.

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

- The Government of India has introduced several policy measures in the Union Budget 2017-18 to provide impetus to the manufacturing sector. Some of which include reduction of income tax rate to 25 per cent for MSME companies having turnover up to Rs 50 crore (US\$ 7.5 million), MAT credit carry forward extended to 15 years from 10 years and abolishment of Foreign Investment Promotion Board (FIPB) by 2017-18.
- The Government of India has removed the 12.5 per cent excise duty and 4 per cent special additional duty (SAD) on the manufacturing of point-of-sale (PoS) machines till March 31, 2017, which is expected to give a boost to the cashless economy as more PoS machines will be deployed in the future.
- The National Institution for Transforming India (NITI Aayog), after its recent push for Rs 6,000 crore (US\$ 900 million) textile sector package, aims to persuade the Government for similar support in the manufacturing sectors with large-scale employment generation opportunities, such as electrical and electronics engineering, footwear and light manufacturing segments, which also have export potential.
- The Ministry of Labour and Employment plans to relax compliance measures for MSMEs by exempting them from inspections related to key labour laws in order to encourage entrepreneurs to help promote manufacturing in India.

- The Government of India plans to give a big boost to local manufacturing by introducing the new 'Make in India green channel', which will reduce the time taken for cargo clearance at ports from about a week to a few hours without any upfront payment of duties.
- Gujarat government is planning to set up an electronics products manufacturing hub in the state, through its newly announced Electronics Policy 2016, which will generate about 500,000 jobs in the electronics sector in the next five years.
- The Ministry of Heavy industries and Public Enterprises, in partnership with industry associations, has announced creation of a start-up centre and a technology fund for the capital goods sector to provide technical, business and financial resources and services to start-ups in the field of manufacturing and services.
- NITI Aayog plans to release a blueprint for various technological interventions which need to be incorporated by the Indian manufacturing economy, with a view to have a sustainable edge over competing neighbours like Bangladesh and Vietnam over the long term.
- Ministry of Commerce and Industry has launched the Technology Acquisition and Development Fund (TADF) under the National Manufacturing Policy (NMP) to facilitate acquisition of Clean, Green and Energy Efficient Technologies, by Micro, Small & Medium Enterprises (MSMEs).
- The Government of India has asked New Delhi's envoys in over 160 countries to focus on economic diplomacy to help government attract investment and transform the 'Make in India' campaign a success to boost growth during the annual heads of mission's conference. Prime Minister, Mr Modi has also utilised the opportunity to brief New Delhi's envoys about the Government's Foreign Policy priority and immediate focus on restoring confidence of foreign investors and augmenting foreign capital inflow to increase growth in manufacturing sector.
- Government of India has planned to invest US\$ 10 billion in two semiconductor plants in order to facilitate electronics manufacturing in the country.
- Entrepreneurs of small-scale businesses in India will soon be able to avail loans under Pradhan Mantri MUDRA Yojana (PMMY). The three products available under the PMMY include: Shishu - covering loans up to Rs 50,000 (US\$ 735), Kishor - covering loans between Rs 50,000 (US\$ 750) to Rs 0.5 million (US\$ 7,500), and Tarun - covering loans between Rs 0.5 million (US\$ 7,500) and Rs 1 million (US\$ 15,000).

Road Ahead

The Government of India has an ambitious plan to locally manufacture as many as 181 products. The move could help infrastructure sectors such as power, oil and gas, and automobile manufacturing that require large capital expenditure and revive the Rs 1,85,000 crore (US\$ 27.75 billion) Indian capital goods business.

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

With impetus on developing industrial corridors and smart cities, the government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

INDIAN ENGINEERING SECTOR

Introduction

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India on its quest to become a global superpower has made significant strides towards the development of its engineering sector. The Government of India has appointed the Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products and services from India. India exports transport equipment, capital goods, other machinery/equipment and light engineering products such as castings, forgings and fasteners to various countries of the world. India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

The capital goods & engineering turnover in India is expected to reach US\$ 125.4 billion by FY17. India exports its engineering goods mostly to the US and Europe, which accounts for over 60 per cent of the total exports. Recently, India's engineering exports to Japan and South Korea have also increased with shipments to these two countries rising by 16 and 60 per cent respectively. Sri Lanka, Nepal and Bangladesh have also emerged as the major destinations for India's engineering exports. Engineering exports from India increased for the sixth straight month at 12.4 per cent year-on-year to US\$ 5.3 billion in January 2017, outperforming that of the overall merchandise export.

Investments

The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing costs, technology and innovation. The above, coupled with favourable regulatory policies and growth in the manufacturing sector has enabled several foreign players to invest in India.

The foreign direct investment (FDI) inflows into India's miscellaneous mechanical and engineering industries during April 2000 to December 2016 stood at around US\$ 3,296.07 million, as per data released by the Department of Industries Policy and Promotion (DIPP). In the recent past there have been many major investments and developments in the Indian engineering and design sector:

Government Initiatives

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100 per cent FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles.

- The Government of India is planning to merge 6 engineering consulting Public Sector Units (PSUs) to create a mega consultancy firm that can take up projects across sectors and compete with the likes of Bechtel of the US and domestic majors like Larsen & Toubro (L&T).
- Steps have also been taken to encourage companies to perform and grow better. For instance, EIL was recently conferred the Navaratna status after it fulfilled the criteria set by the Department of Public Enterprises, Ministry of Heavy Industries and Public Enterprises, Government of India. The conferred status would give the state-owned firm more financial and operational autonomy.

- Government of India has also taken initiatives to provide a level playing field to domestic and foreign private players bidding for the government contracts in defence sector. The government has withdrawn excise and customs duty exemptions granted to goods manufactured and supplied to the defence ministry by state-owned defence firms. These steps will also encourage participation of foreign Original Equipment Manufacturers such as Boeing, Airbus, Lockheed Martin, BAE Systems, etc., in the sector..
- Government announced a partnership between Bloomberg Philanthropies and the Ministry of Urban Development, Government of India, to advance the "Smart Cities Initiative." The Smart Cities Initiative is a historic effort to promote economic growth, improve governance, and deliver more effective and efficient public services to India's urban residents.

Road Ahead

The engineering sector is a growing market. Spending on engineering services is projected to increase to US\$ 1.1 trillion by 2020.

Our Business Strategy and Planning

1. Focus on Increase in Volume of Sales

We intend to focus on increasing the volume of sales in the markets we operate. As a manufacturing and trading Company we want to focus on larger volume of sales by extending our market segments and by further addition of new products in our current portfolio to achieve our targeted sales.

2. Augment our working capital base in order to better utilize our installed capacities

Our business of manufacturing of material handling equipment's is working capital intensive. We need to maintain sufficient inventory for the production process and also maintain a balance between debtors & creditors cycle. Since, we are not fully utilizing our installed capacities, our growth depends on our ability to increase our utilization over the next few years and also adding new capacity subsequently. This expansion needs access to a larger amount of liquid funds and sufficient working capital. For further details of the proposed working capital requirements of our company, kindly refer to the chapter titled "Objects of the Issue" on page 70 of this Draft Letter of Offer. We believe that being well funded in the working capital domain will help us in the following strategic initiatives:

- Accelerate development of new products to suit different needs of customers.
- Respond to market dynamics and provide custom based designs with focus on customer satisfaction.
- Focus on producing / marketing high value priced products.

3. Customer Satisfaction

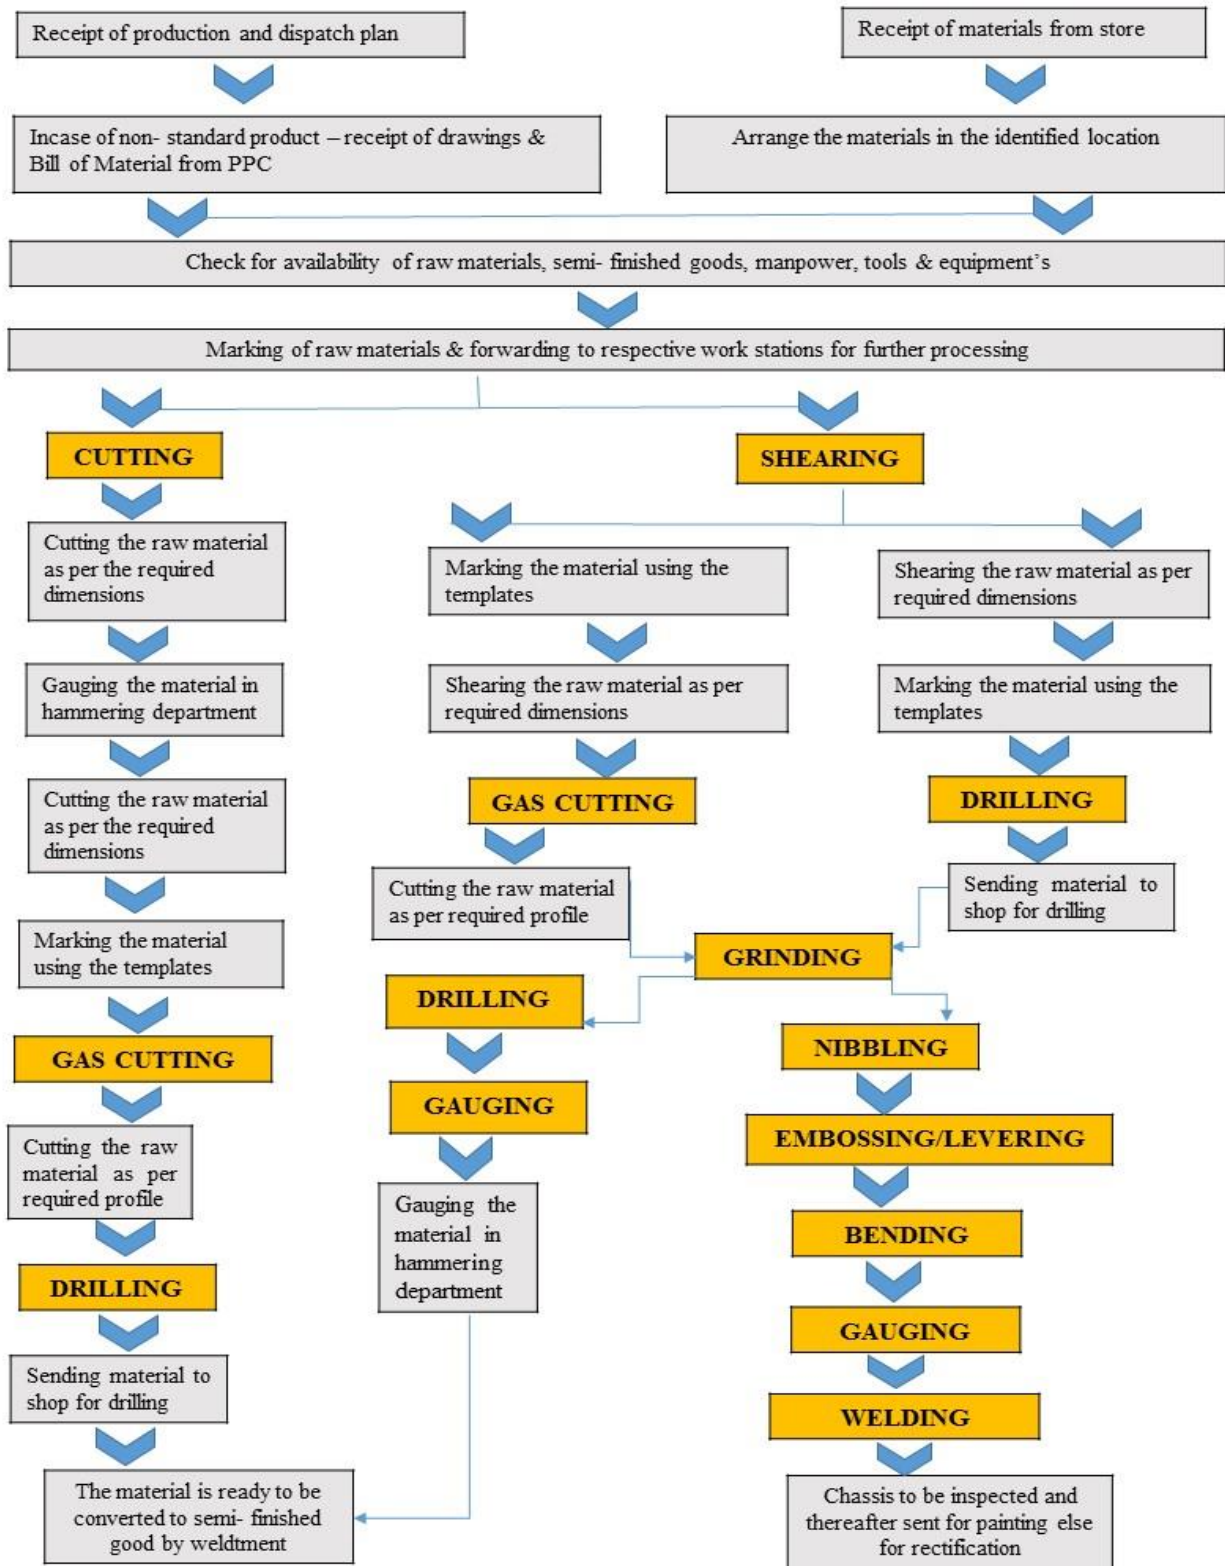

Our Company is customer satisfaction oriented company and always tries to maintain good relationship with the customers. Our Company's marketing team approaches existing customer for their feedback and based on that feedback any changes in the products if required are carried out. Our Company provides quality products and effective follow-ups with customers which ensures that customers are satisfied with the products. Our Company in return is rewarded by customers with continuous orders.

4. Optimal Utilization of Resources

Our Company constantly endeavors to improve our production process, skill up-gradation of workers, modernization of machineries to optimize the utilization of resources. We regularly analyze our existing raw material procurement policy and manufacturing processes to identify the areas of bottlenecks and correct the same. This helps us in improving efficiency and putting resources to optimal use.

Our Manufacturing Process

Fabrication Process

The manufacturing process can be detailed as follows:

Fabrication Process

Procurement of Raw Materials

Our Manufacturing process starts with procurement of raw materials. For regular and uninterrupted supply of raw materials, we have regular suppliers from whom we source our major raw material requirements. Beside this, our Company also import raw materials from time to time.

Storage of raw materials

Our Company has sufficient space to store the raw material before it is taken into use for production.

Receipt of materials from store department

The quality of raw material received from the suppliers is tested as per the quality and deposit the same with the Store department if material pass test quality. If not, it is returned to the supplier through the Suppliers Department.

Preparation of production and dispatch plan

Production and dispatch chart/plan is prepared and production schedule.

Check for the availability of raw materials, manpower, tools & equipment's.

The on field engineer as per the production plan checks the availability of required resources i.e. raw materials, man-power, tools and equipment's and in case any shortage of resources senior factory manager has to make proper arrangements.

Marking / Tagging of raw materials

These raw materials are then marked/ tagged, segregated and arranged in respective work station for further processing if needed.

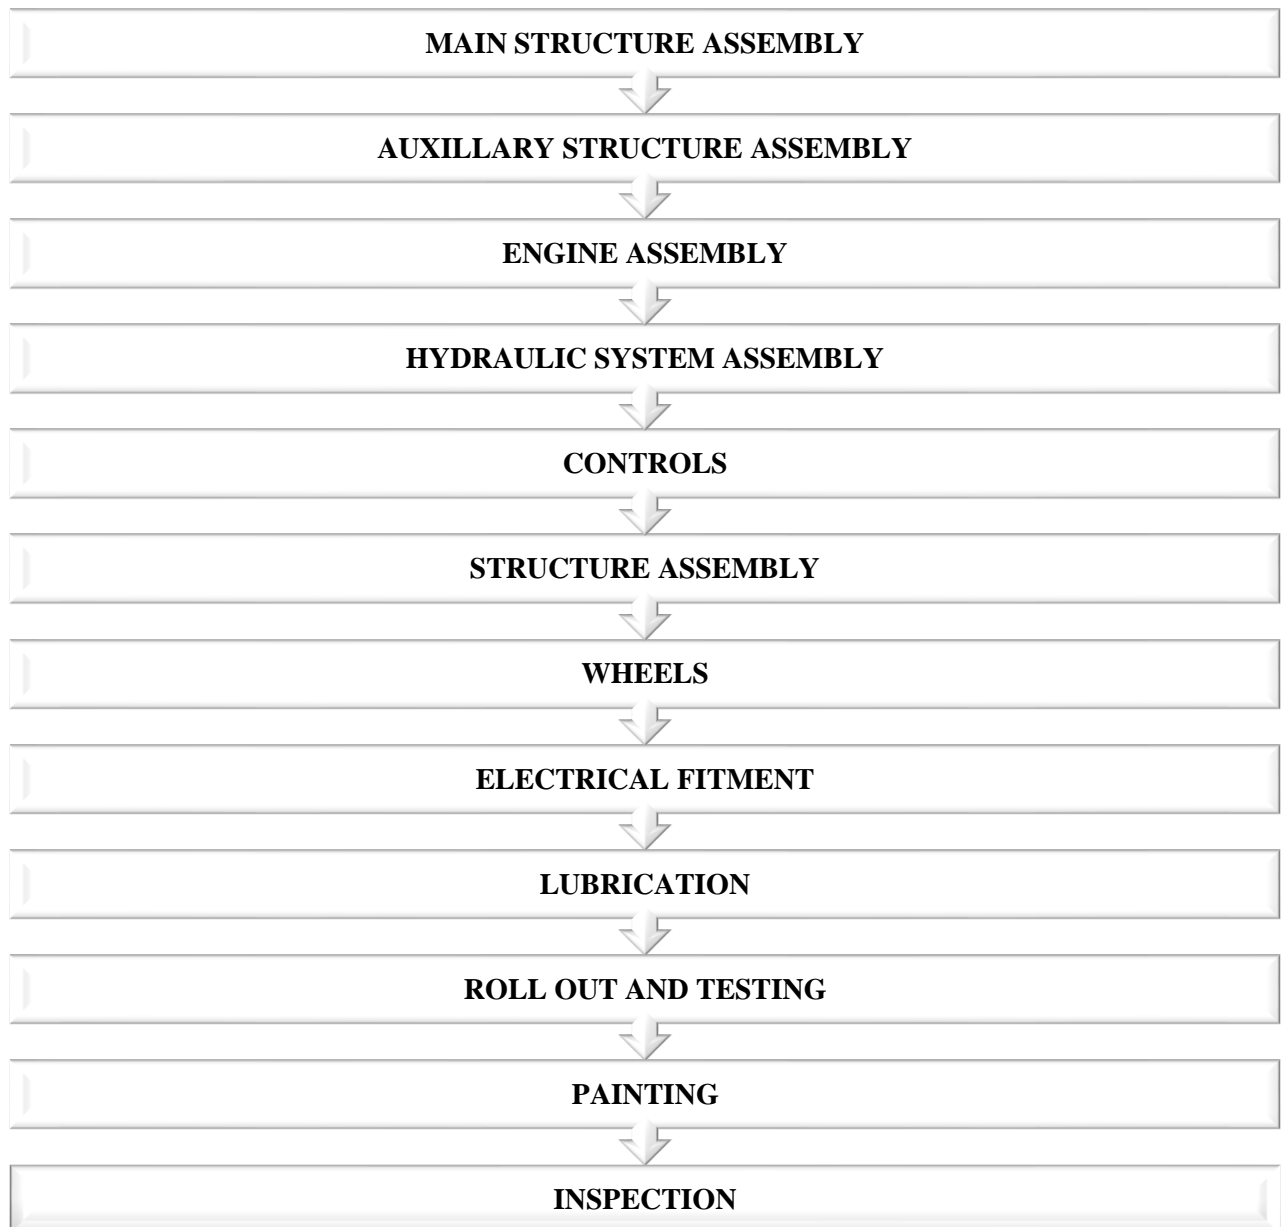

Process 1

Under this process, raw materials are cut as per the required dimensions and custom needs, thereafter gauging of the material is done in hammering department thereby marking the material. Another way of cutting raw material is by gas cutting. Thereafter, the processed material is sent for drilling in machine shop and then it is ready to be converted to semi-finished good by welding the same.

Process 2

Under this process, as the materials are received from the respective work stations for further processing they are marked using the templates and shearing process (basically cutting) of the raw materials takes place as per the required dimensions. Thereafter the material is sent in for drilling in the machine shop in bulks and then the material is sent into grinding process where shallow cuts are made thereby reducing the diameter of the material to accurate level. After grinding, the metal sheet embossing operation is commonly accomplished with a combination of heat and pressure on the sheet metal, depending on type of embossing is required and shaping of the metal sheet is done with the help of bending process. Then gauging and welding process is performed and chassis are prepared and sent for inspection. If found faulty then it is sent back for rectification else to painting section.

INTELLECTUAL PROPERTY LAWS

Intellectual Property in India enjoys protection under both common law and statute. Under statute, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957, trademark protection under the Trade Marks Act, 1999 and design protection under the Designs Act, 2000. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

The Trademarks Act, 1999

In India, trademarks enjoy protection under both statutory and common law. Indian trademark law permits the registration of trademarks for goods and services. The Trademarks Act governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. Certification marks and collective marks can also be registered under the Trademarks Act. An application for trademark registration may be made by individual or joint applicants by any person claiming to be the proprietor of a trade mark, and can be made on the basis of either use or intention to use a trademark in the future. Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten years unless cancelled. If not renewed after ten years, the mark lapses and the registration has to be restored. While both registered and unregistered trademarks are protected under Indian Law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. The Trademark (Amendment) Act, 2010 has been enacted by the Government of India to amend the Trademarks Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries, and to empower the Registrar of Trademarks to do so. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to bring the law generally in line with international practice.

In addition to the broad requirement that an invention satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection, the Patents Act stipulates that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The Patents Act prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. The term of a patent granted under the Patents Act is twenty years from the date of filing of the application for the patent.

Nomination facility to Investor

Nomination facility is available in respect of the Equity Shares in accordance with the provisions of the Section 72 of the Companies Act read with Rule 19 of the Companies (Share Capital and Debenture) Rules, 2014. A person, being a nominee, becoming entitled to the Equity Shares by reason of the death of the original Eligible Equity Shareholder(s), shall be entitled to the same advantages to which he would be entitled if he were the registered holder of the Equity Shares. Where the nominee is a minor, the Eligible Equity Shareholder(s) may also make a nomination to appoint, in the prescribed manner, any person to become entitled to the Equity Share(s), in the event of death of the said holder, during the minority of the nominee. - to register himself or herself as the holder of the Equity Shares; or
- to make such transfer of the Equity Shares, as the deceased holder could have made.

If the person being a nominee, so becoming entitled, elects to be registered as holder of the Equity Share himself, he shall deliver to our Company a notice in writing signed by him stating that he so elects and such notice shall be accompanied with the death certificate of the deceased holder.

Further, the Board may at any time give notice requiring any nominee to choose either to be registered himself or herself or to transfer the Equity Shares, and if the notice is not complied with within a period of ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other moneys payable in respect of the Equity Shares, until the requirements of the notice have been complied with.

Only one nomination would be applicable for one folio. Hence, in case the Equity Shareholder(s) has already registered the nomination with us, no further nomination needs to be made for Equity Shares that may be allotted in this Issue under the same folio.

In case the allotment of Equity Shares is in dematerialized form, there is no need to make a separate nomination for the Equity Shares to be allotted in this Issue. Nominations registered with respective Depository Participant (“DP”) of the Applicant would prevail. Any Applicant desirous of changing the existing nomination is requested to inform their respective DP.

Nonetheless, it should be ensured that the depository account is in the name(s) of the Eligible Equity Shareholders and the names are in the same order as in our records.
- The responsibility for correctness of information (including Investor's age and other details) filled in the CAF vis-à-vis such information with the Investor's depository participant, would rest with the Investor. Investors should ensure that the names of the Investors and the order in which they appear in CAF should be the same as registered with the Investor's depository participant
- If incomplete / incorrect beneficiary account details are given in the CAF, the Investor will get Rights Equity Shares in physical form.

- The Rights Equity Shares allotted to applicants opting for issue in dematerialized form, would be directly credited to the beneficiary account as given in the CAF after verification. Allotment advice, refund order (if any) would be sent directly to the applicant by the Registrar to the Issue but the applicant's depository participant will provide to the applicant the confirmation of the credit of such Equity Shares to the applicant's depository account. It may be noted that Equity Shares in electronic form can be traded only on the Stock Exchanges having electronic connectivity with NSDL and CDSL.

Investment by FPIs, FIIs and QFIs

SEBI, On January 7, 2014, notified the SEBI FPI Regulations pursuant to which FIIs, its sub-accounts and QFIs categories of investors were merged to form a new category called 'Foreign Portfolio Investors'. Prior to the notification of the SEBI FPI Regulations, portfolio investments by FIIs and sub-accounts were governed by SEBI under the FII Regulations and portfolio investments by QFIs were governed by various circulars issued by SEBI from time to time (**QFI Circulars**). Pursuant to the notification of the SEBI FPI Regulations, the FII Regulations were repealed and the QFI Circulars were rescinded.

In terms of the SEBI FPI Regulations, the issue of Equity Shares to a single FPI or an Investor group (*which means the same set of ultimate beneficial owner(s) investing through multiple entities*) is not permitted to exceed 10% of our Company's post-Issue Equity Share Capital. Further, in terms of the FEMA Regulations, the total holding by each FPI shall be below 10% of the total paid-up Equity Share

Capital of our Company and the total holdings of all FPIs put together shall not exceed 24% of the paid up Equity Share Capital of our Company.

FPIs are permitted to participate in the Issue subject to compliance with conditions and restrictions which may be specified by the Government from time to time.

An FII who holds a valid certificate of registration from SEBI shall be deemed to be an FPI until the expiry of the block of three years for which fees have been paid as per the SEBI FII Regulations. An FII or a sub-account (other than a sub-account which is a foreign corporate or a foreign individual) may participate in the Issue, until expiry of its registration as an FII or sub-account or until it obtains a certificate of registration as an FPI, whichever is earlier. An FII or sub-account shall not be eligible to invest as an FII after registering as an FPI under the SEBI FPI Regulations.

In terms of the FEMA Regulations, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs as well as holding of FIIs (*being deemed FPIs*) shall be included.

Further, in terms of the SEBI (FPI) Regulations, a QFI may continue to buy, sell or otherwise deal in securities, subject to the provisions of the SEBI (FPI) Regulations, until January 6, 2015 (or such other date as may be specified by SEBI) or until the QFI obtains a certificate of registration as FPI, whichever is earlier.

The existing individual and aggregate investment limits for Eligible QFIs in an Indian company are 5% and 10% of the paid-up capital of an Indian company, respectively. In terms of the FEMA Regulations, a QFI shall not be eligible to invest as a QFI upon obtaining registration as an FPI. However, all investments made by a QFI in accordance with the regulations, prior to registration as an FPI shall continue to be valid and taken into account for computation of the aggregate limit.
