JFDH, Plus Series 2.0 to 3.5 ton Internal Combustion Forklifts..

Josts has introduced high performance Diesel Forklift Trucks of capacity ranging from 2.0 to 3.5 ton, specially constructed for demanding warehousing and industrial application in iron, metal processing units, building material industries, chemical industries and forwarding agents. They are provided with special designed engines for high torque and smooth drive characteristics.

The heavy duty engines enables powerful acceleration from standing with plenty of power in reverse use in amps and gradients. With these, the forklift trucks can be relied in hardest application. The long wheel base, large track width with high steering axle suspension and low centre of gravity provides optimum load distribution and straight travel. Thereby, providing - Best value for the money invested . . .
