

Since 1907

Your safety is our business..

Calibration Services for Gas Detection Systems

Founded as a family business in France in 1840, Oldham Gas is one of the leading safety, fire and gas detection companies in the world. Our parent company, Industrial Scientific Corporation, is the world's premier provider of iNet—gas detection as a service.

We Jost's Engineering Company Limited represent M/s OLDHAM for their entire range of Gas Detection Systems which includes Hydrocarbon as well as toxic gas detectors.

Along with sales, we also provide complete technical support for Oldham make products which includes calibration, maintenance & AMCs.

With our Service Support you can be assured of -

1. Safety of the personnel working in probable gas leak areas can be ensured.
2. Sensors (Detectors) can be used more effectively to reduce gas leakages, which counts for costs.
3. By maintaining the sensor with preventive maintenance and calibration schedules the sensor life will be enhanced.
4. The preventive maintenance procedures reduce the possibility of major breakdowns of the plant that involves major capital investments and down time.
5. To maintain the sensor in perfect condition, we carryout preventive, predictive maintenance and calibration procedures required for the sensor at required duration.

We offer :

Calibration of gas detectors # Annual Maintenance Contract # Repairs
