

DANTEC PIV system for velocity, turbulence measurement and flow visualization

DANTEC CTA system for velocity and turbulence measurement

DANTEC Digital Image Correlation System for stress and strain measurement

DANTEC CTA Thermal Comfort Sense

ix High Speed Camera for Automotive testing, vehicle impact, rockers, explosion, drop testing

Calmar Femtosecond Laser for optical high speed sampling

Cordin Rotating Mirror & Image Converter Streak Cameras for capturing variations in intensity from a line image, a spread spectrum, or linear array of discrete signals with resolution down into picoseconds
