

Complete Noise Mapping Solution by **SoftNoise**

Predictor-LimA Software is the complete solution for Environmental Impact Assessment Studies. It bundles the intuitive Predictor GUI and flexible LimA GUI in one powerful package that provides the best solution for small-scale industrial situations to large-scale noise mapping.

Why choose Predictor-Lima?

- ◆ Most intuitive and powerful software.
- ◆ Unique multi-user Cloud Calculation Service option enables you to set up calculations from anywhere without investment in a server environment.
- ◆ Meets ISO 17534 quality assurance standards ensures documented compliance with calculation methods such as ISO 9613 and CNOSSOS-EU.

Application

Industry | Roads | Railways | Aircraft | Wind Turbines

The software is used by acoustic consultants, environmental authorities, heavy industries & educational institutes.

Predictor Lima Packages

Predictor Basic Standard Type 7810-I	Impact studies for small areas and short stretches of highways and railways. Road, rail, industry, wind turbines.
Predictor Basic Plus Type 7810-C	Impact studies for large areas and medium long stretches of highways and railways.
Predictor-LimA Standard Type 7810-G	Impact studies for small areas and short stretches of highways and railways. Road, rail, industry, wind turbines, CNOSSOS-EU. Optional air-traffic. Integration in GIS systems.
Predictor-LimA Plus Type 7810-A	Impact studies for large areas and medium long stretches of highways and railways. Road, rail, industry, wind turbines, CNOSSOS-EU. Optional air-traffic. Integration in GIS systems.
Predictor-LimA Advanced Type 7810-B	EU Noise maps. Large scale city wide noise mapping. Road, rail, industry, wind turbines, CNOSSOS-EU. Optional air-traffic. Integration in GIS systems.
